

SEAL SOURCE INC.TM
HYDRAULIC SEALING COMPONENTS SPECIALISTS

OPTIONAL REPLACEMENT PARTS FOR CARTERPILLAR EQUIPMENT

Standard Material	Temperature Range
Carbon Chromium Steel	-58° F to +302 °F (-50 °C to +150 °C)

Radial spherical plain bearings have an inner ring with a sphered convex outside surface and an outer ring with a correspondingly sphered but concave inside surface. Their design makes them particularly suitable for bearing arrangements where alignment movements between shaft and housing have to be accommodated, or where oscillating or recurrent tilting or slewing movements must be permitted at relatively slow sliding speeds.
